

5 – 3 Supporting Construction Millwright Apprentices From In-School Training to C of Q

This workshop will present the highlights from a province-wide consultation to identify what academic supports would be useful for construction millwright apprentices throughout their apprenticeship process. This includes extra support for numeracy, computers, document use, test taking and study skills. It also includes support in preparing to take the Certificate of Qualification (C of Q) exam once the in-class components are finished. The consultations are part of a larger project supported by the Millwright Regional Council of Ontario (MRCO) in partnership with the College Sector Committee (CSC)
